

NC STATE UNIVERSITY

Advances in Statistical Methods for the Analysis of Observational and Experimental Data

A Symposium in Honor of Butch Tsiatis

July 12-13, 2013

Department of Statistics

North Carolina State University

This one-day conference on July 13 will review advances in statistical methods for analysis of observational and experimental data and feature noted speakers, including James M. Robins, Thomas A. Louis, Geert Molenberghs, and many more

The conference will be preceded by an evening reception on July 12 and followed by an optional dinner/dance on July 13 at the Marriott Raleigh City Center, with music by Island Sound and Video and your favorite adult beverages

Details on both conference and dinner/dance at
